**DEVELOPMENT ADMINISTRATION CIRCULAR
NO. 2 YEAR 2005**

**GUIDELINE ON ESTABLISHING KEY PERFORMANCE INDICATORS
(KPI) AND IMPLEMENTING PERFORMANCE ASSESSEMENT AT
GOVERNMENT AGENCY**

PURPOSE

This circular aims at providing an explanation and guidance to Head of Agency on strategy, approach and steps to establish *Key Performance Indicators* (KPI) and to implement performance assessment at respective agencies. **Guideline on Establishing Key Performance Indicators (KPI) implement performance assessment at Government Agency** is in Appendix attached to this circular.

BACKGROUND

2. Malaysia Civil Service is able to achieve world class through implementation of programs that focus on five areas:

- a. mind and attitude that strive for excellence
- b. noble ethics
- c. knowledge- and skill-based human resource development
- d. performance-based work culture
- e. strong leadership capacity

3. Therefore, Government has proposed that performance-based work culture to be inculcated in the Civil Service. The implementation of this performance-based work culture aims to upgrade the quality of delivery services at Government agencies for the customers.

4. Several efforts have been made before this that focused on the same purpose, including individual and organizational performance assessments through Annual Work Objective (SKT), competency evaluation under Malaysia Pension System (SSM), assessment on efficiency of Quality Management System through MS ISO 9000 and Total Quality Management (TQM), ability to resolve problems innovatively through Quality Circle Group (KMK) and benchmark best practices through Quality Awards in Civil Service. Customer Charter is also established at Government agencies and it becomes a service quality standard that can be measured to assess the achievement and performance of an agency.

GUIDELINE USAGE

5. The attached **Guideline on Establishing Key Performance Indicators (KPI) implement performance assessment at Government Agency** with his letter is to provide an assessment system that is more organized, complete, and comprehensive. This guideline, among others, explains the following matters:

- a. Process-based Model for Performance Assessment of Government Agency
- b. Steps to establish KPI and implement performance assessment at Government agency
- c. Strategies to establish KPI and implement performance assessment at Government agency

6. Government agencies, which have implemented MS ISO 9000, have a basis and experience that will ease such agencies to implement this directive. In addition, the implementation of this Development Administration Circular (PKPA) will strengthen and complement assessment efforts that are parts of MS ISO 9000 standard. The requirement to assess the performance in circular should be conducted at least **once in every quarter each year**.

7. The Task Force to Reduce Bureaucratic Procedures at the Ministry is responsible to monitor the implementation of performance assessment at the Ministry and agencies under the Ministry. Performance assessment must be implemented continuously to upgrade the excellent service delivery of the Government agency for the customer.

ENFORCEMENT

8. This circular should be implemented completely at agency's frontline especially agency that offer counter services to public and community of trade and industry. In addition, other agencies besides frontline services should also implement this circular.

9. Depending in the acceptance by respective authorities, the allocation in this circular is extended to all State Civil Service, Statutory Body, and Local Authority.

EFFECTIVE DATE

10. This Letter of General Directive is effective form the date it is issued.

“SERVICE TO THE NATION”

A handwritten signature in black ink, appearing to read 'Tan Sri Samsudin Bin Osman', with a stylized flourish at the end.

TAN SRI SAMSUDIN BIN OSMAN
Chief Secretary to the Government

(Appendix to
Development
Administration
Circular No. 2 Year
2005)

GUIDELINE TO DEVELOP KEY PERFORMANCE INDICATORS (KPI) AND IMPLEMENTING PERFORMANCE ASSESSMENT AT GOVERNMENT AGENCY

PURPOSE

This guideline is to provide descriptions on the model, steps and strategy in developing the Key Performance Indicators (KPI) and implementing performance ASSESSMENT at the Government agency.

TERMINOLOGY

2. A few terminologies used in this guideline are as followed:

- | | |
|--|--|
| <i>(a)</i> Core business: | Agency responsibility in line with the vision and mission of the agency; |
| <i>(b)</i> Core process: | Functions under the core service that need to be carried out to provide service for customers; |
| <i>(c)</i> Service Delivered to Customers: | Service provided by the core process to be delivered to customers in line with the core service; |
| <i>(d)</i> Customers: | Receiver or service user provided by the agency; |
| <i>(e)</i> Key Performance Indicators (KPI): | key performance indicators determined as the basic to measure performance; |
| <i>(f)</i> Performance Target: | Target set for every KPI to enable performance measured; and |
| <i>(g)</i> SMART: | Specific, measurable, achievable, realistic and time bound. |

BACKGROUND

3. Government has suggested for the work culture based on performance inculcated in the Civil Service. This performance assessment is to upgrade the quality of delivery service of the Government agency to the customers specifically the public.

4. Government Agency is developed to offer service to the customers. Service that needs to be delivered by the agency is determined by the function of the agency, in line with the vision, mission and objective of the agency. To ensure that the service delivered is of quality in line with the function, vision and mission of the agency and fulfilled the customers' needs, Government agency needs to assess the performance of the service. The outcome of the assessment on services delivered to customers will depict the overall performance of the agency.

BASIC PRINCIPLES OF PERFORMANCE ASSESSMENT AT THE GOVERNMENT AGENCY

5. The implementation of the performance assessment at the Government agency is based on the basic principles as followed:

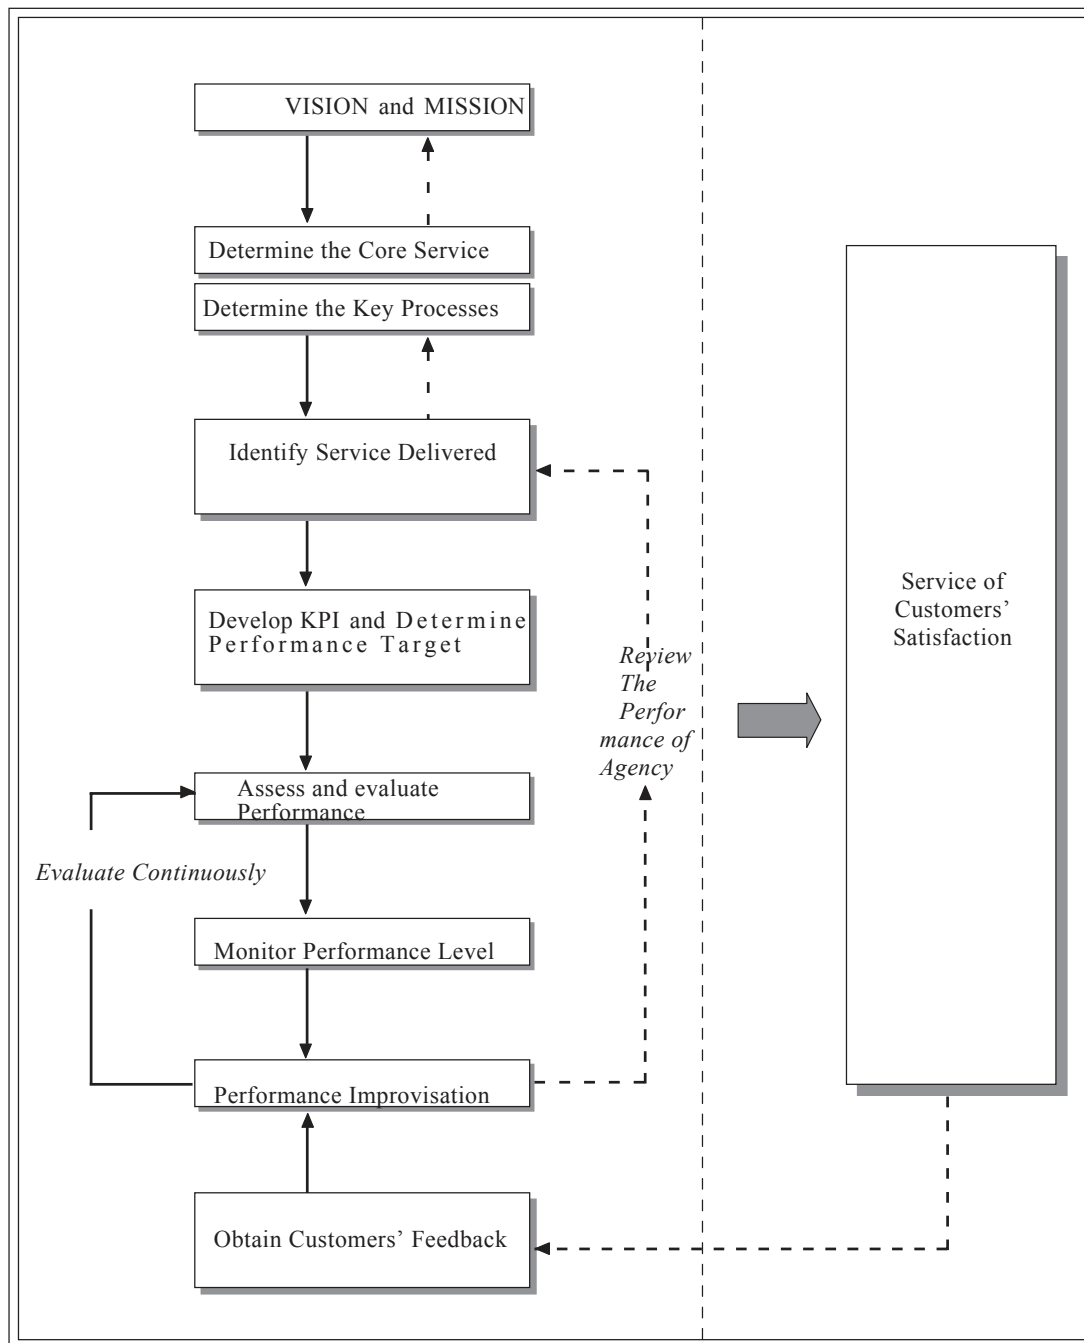

- (a) Performance assessment at the Government agency is to evaluate the quality of service delivery for customers.
- (b) The focus of this assessment is on the main services delivered by the agency to customers.
- (c) These main services are assessed in term of the process to provide and deliver it to the customers and the level of customers' satisfaction towards the services offered.
- (d) For a start, the implementation of the assessment at the Government agency is made based on the current process of the agency.
- (e) The implementation of the performance assessment requires the agency to develop KPI and determine the performance target as a basis to the assessment.
- (f) The set performance target must take into consideration the following matters:
 - (i) Process capability which covers the work flow, the requirement for human resource, financial, equipment, infrastructure and environment appropriate to provide service to customers.
 - (ii) Needs, expectation and feedback from customers.
- (g) Performance target set to assess KPI must fulfil *SMART* criteria (which are *specific, measurable, achievable, realistic, time bound*)
- (h) Assessment, evaluation, observation and improvisation action need to be implemented continuously.
- (i) Service delivered to customers need to be reviewed occasionally to ensure it is always relevant and effective.

PROCESS-BASED PERFORMANCE ASSESSMENT MODEL OF THE GOVERNMENT AGENCY

6. The performance assessment at the Government agency is conducted using the Process-Based Performance Assessment Model of Government Agency. The model is as in **Diagram 1**.

DIAGRAM 1

PROCESS-BASED PERFORMANCE ASSESSMENT
MODEL OF GOVERNMENT AGENCY

7. Government agency needs to start the assessment implementation by determining the core business of each agency in line with the vision, mission and objective of the agency. Next, the agency needs to determine all the core process and identify service requirements to be provided and delivered to customers under each of the core process. All services delivered by the Government agency to customers needs to be assessed to evaluate its performance.

8. Assessment implementation require agency to develop KPI and determine the performance target fro each KPI as a basis to assess each service performance. KPI developed must cover aspect of efficiency and effectiveness of the core processes in producing and delivery service to customers and aspect of customers' satisfaction towards the service received.

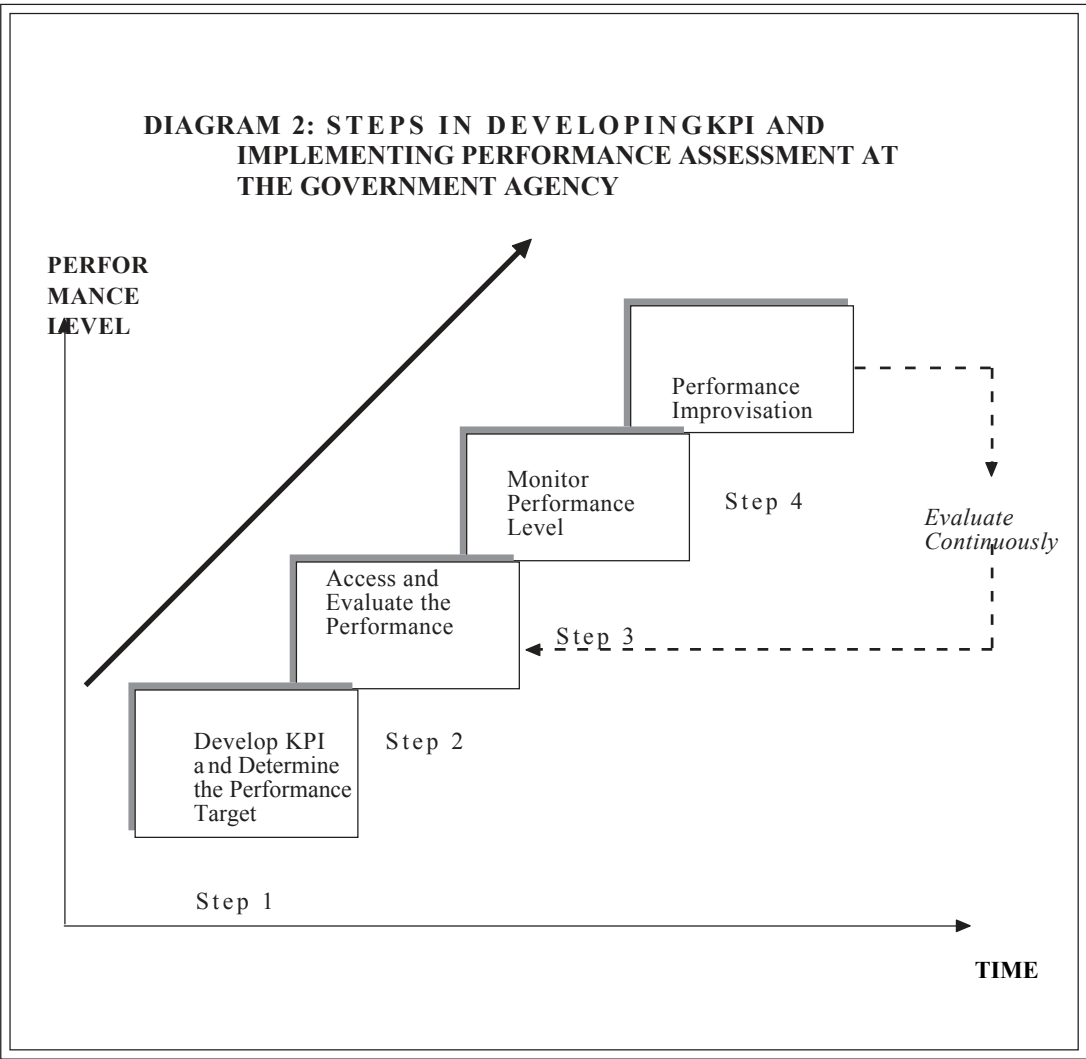

9. The efficiency of the core processes to provide and deliver service to customers is assessed specifically, in term of how fast and accurate the service provided and delivered to customers. The effectiveness is assessed in term of the number of output produced within a time fixed as planned whereas the productivity of human resource and financial to produce the output is also assessed. The customers' satisfaction is assessed specifically in term of complaints given in written feedback within time fixed, valid complaints solved and the level of customers' satisfaction gathered through the Customers' Satisfaction Form for Counter Service, and study on the level of customers' satisfaction implemented. This KPI is a basic KPI that must be developed by the Government agency. However, apart from this basic KPI the agency may develop other KPI found appropriate to assess its own performance.

10. The performance of service production and delivery requirements to be assessed, evaluated, monitored and improvised continuously so that the service can be delivered to customers quickly, accurately, and effectively. Apart from that, Government agency needs to review the service delivered to customers holistically to ensure it is always relevant and effective in line with the vision, mission and objective of the agency and the customers' needs. This review must be implemented occasionally or when changes occur, among which are changes in policy, structure, and environment.

STEPS IN DEVELOPING KPI AND IMPLEMENTING PERFORMANCE ASSESSMENT AT THE GOVERNMENT AGENCY

11. Steps need to be implemented by Government agency to establish KPI and carry out performance assessment at respective agencies as shown in **Diagram 2**.

DIAGRAM 2: STEPS IN DEVELOPING KPI AND IMPLEMENTING PERFORMANCE ASSESSMENT AT THE GOVERNMENT AGENCY

Step 1: Develop KPI and Determine Performance Target	
<p>KPI needs to be developed to assess the performance of each service delivered to customers. KPI also needs to be developed to assess the level of customers' satisfaction towards the service received. For every KPI developed, the performance target requirements to be determined to enable the particular KPI assessed. Performance target must be specific, assessable, and realistic, and can be achieved within the specific time. For this purpose, agency needs to take into consideration of the work load and process capability which covers working style, requirement for the current human resource, financial, equipment, infrastructure, and environment when deciding on the assessment target. For agency which has carried out MS ISO 9000, quality objective set can be used in developing KPI and setting the performance target. Agency's Customers Carte also can be used to develop KPI and set the performance target. Other indicators existing in the agency can also be used to develop KPI and set the performance target.</p>	
No.	Action
1	Determine the core service based in vision, mission and objective of the agency.
2	Ensure all the core process is under the core service.
3	Identify the services delivered to customers under each core process.
4	<p>Develop basic KPI for each service covering three aspects below:</p> <ul style="list-style-type: none"> a. KPI to assess efficiency and effectiveness of process to provide and deliver service to customers. b. KPI to assess human resource and financial productivity to provide and delivery service to customers. c. KPI to assess customers' satisfaction towards the service received. <p>A. KPI to measure efficiency and effectiveness of process to provide and delivery service to customers.</p> <p>Basic KPI that can be developed accordingly to suitability include:</p> <ul style="list-style-type: none"> a. Waiting period at the counter. b. Period of giving responds to customers.

No.	Action
5	<p>c. Duration of serving during the service is received.</p> <p>d. Cycle period of producing and delivering a service.</p> <p>e. Error percentage for the service delivered.</p> <p>f. Number of output produced within the time fixed as planned.</p> <p>B. KPI to measure human resource and financial productivity to provide and deliver service to customers.</p> <p>KPI that can be developed includes:</p> <p>a. Productivity of individual/a group within the time fixed.</p> <p>b. Expenses used to provide and deliver a service to customer.</p> <p>KPI developed for A and B above is based on the work flow of every process related.</p> <p>C. KPI to measure customers' satisfaction towards service received.</p> <p>Basic KPI that need to be developed includes:</p> <p>a. Level of customers' satisfaction towards counter service evaluated through the Customers' Satisfaction Form.</p> <p>b. Level of customers' satisfaction towards the service of the agency on the whole through the study of the customers' satisfaction.</p> <p>c. Percentage of the customers' complaint taken action and given feedback within the time fixed.</p> <p>d. Percentage of valid complaints solved within the time fixed.</p> <p>Apart from the basic KPI recommended for the three aspects above, agency may develop other KPI found suitable for assessing performance of each agency.</p> <p>Decide on the performance target to enable every KPI assessed. This target can be decided based on the work load, experience, existing capability, and trend analysis and agency progress record.</p>

Percentage of customers' complaint taken action over and given feedback within 7 days	100% of complaints are given feedback within 7 days	Duration determined starting from the date complaint received, taken action and feedback given to the complainer.		d. Percentage of valid complaints solved within 30 days	95% of complaints solved within 30 days	Duration is determined starting from the date complaint received up to the complaint solved and customers informed.	
KPI	PERFORMANCE TARGET																		
a. Customers' satisfaction towards the counter service	95% customers are satisfied																		
The level of customers' satisfaction towards the counter is evaluated using the Customers' Satisfaction Form																			
b. Customers' satisfaction level for the overall service of agency	95% are satisfied																		
The customers' satisfaction towards the service of the agency on the whole may be assessed through the study on the level of customers' satisfaction implemented according to the prescribed schedule.																			
c. Percentage of customers' complaint taken action over and given feedback within 7 days	100% of complaints are given feedback within 7 days																		
Duration determined starting from the date complaint received, taken action and feedback given to the complainer.																			
d. Percentage of valid complaints solved within 30 days	95% of complaints solved within 30 days																		
Duration is determined starting from the date complaint received up to the complaint solved and customers informed.																			

Step 2 : Assess and Evaluate Performance	
<p>After KPI is developed and deciding on the performance target for every KPI, agency must execute performance assessment and evaluation by comparing the actual progress with the performance target determined, making cause analysis of the difference and suggest the improvisation action to the higher management of the agency.</p>	
No.	Action
1	List KPI and performance target determined.
2	Gather data on the actual progress for every KPI.
3	Compare actual progress with the performance target for every KPI.
4	Calculate the progress percentage for every KPI and identify the progress difference.
5	Do analysis and conclude on the performance progress for every service delivered to customers based on all progress KPI developed for every service.
6	Do analysis on the difference and study the cause for the difference.
7	<p>Prepare report on the level of performance progress of the agency on the whole consisting:</p> <ol style="list-style-type: none"> Analyse the performance target progress for every service. Analysis on the actual progress difference to the performance target of every KPI determined. Analysis on the causes of the difference occurrence. Rectification action and improvisation suggestion to upgrade the service performance level delivered to customers.

Step 3: Monitor Performance Level

Head of Agency is responsible to monitor the service performance delivery for customers continuously. Head of agency needs to report the performance progress of his agency to the Task Force to Reduce Bureaucratic Procedures. Task Force to Reduce Bureaucratic Procedures needs to ensure the service delivered to customers is of effective, effective and fulfil the customers' needs at all time. This Task Force is responsible to monitor, re-evaluate, and improvise the performance of the agency consistently and berkala. The feedback of the observation needs to be the fixed meeting agenda of the Task Force to Reduce Bureaucratic Procedures. Task Force also needs to review requirement of human resource, financial, tools and equipment needed to conduct the task effectively.

No.	Action
1	<p>Head of Agency</p> <p>Review matters below and prepare report to the Task Force to Reduce Bureaucratic Procedures Meeting:</p> <ul style="list-style-type: none">a. Performance progress for each service delivery to customers.b. Level of customers' satisfaction on the service delivery.c. Problem, issue, difference and its.d. The requirement for human resource, financial, tool and equipment needed.e. The capability to produce and deliver service to customers.
2	<p>Task Force to Reduce Bureaucratic Procedures</p> <p>Review report of the agency progress and decide on the level of service performance delivered by the agency to customer by giving the focus to:</p> <ul style="list-style-type: none">a. Upgrade the efficiency and effectively of the process through:<ul style="list-style-type: none">i. Reengineering process to improvise and stabilise processes in the agency by suspending overlapping steps, repeated, not relevant and not having additional value. PKPA

No.	Action
	<p data-bbox="651 239 1263 331">Nol. 1 Year 2002 entitled Guideline to Revise the Procedure and Work Process at Government Agency can be of a reference and guide for this purpose.</p> <ul style="list-style-type: none"> <li data-bbox="597 352 1263 445">ii. Implement the power delegation and empowerment approach to ensure service can be delivered quickly and efficiently. <li data-bbox="586 466 1263 558">iii. ICT usage to upgrade the efficiency of process implementation where time duration to provide service can be reduced. <ul style="list-style-type: none"> <li data-bbox="505 579 1263 638">b. Implementing research and development and producing innovation to improvise service production process capability. <li data-bbox="505 659 1263 718">c. Competency upgrade of the agency member through training, course and relocateas well as study every field of competency set. <li data-bbox="505 739 1263 831">d. Preparation of appropriate and sufficient tools and equipment to carry out process of service producing and delivering quickly, accurately, efficiently and effectively.

Step 4: Performance Improvisation	
Head of Agency needs to take improvisation action based on the decision of Task Force to Reduce Bureaucratic Procedures .	
No.	Action
1	Implement the improvisation as decided by the Task Force to Reduce Bureaucratic Procedures
2	<p>Reporting the improvisation implementation status to the Meeting of the Task Force to Reduce Bureaucratic Procedures once a month. Further action is repeating step 2 up to step 4. This action must be done continuously to further improvise agency performance level on the whole to the more excellent level and upgrade the customers' satisfaction towards the service delivered.</p> <p>For example, to upgrade passport issuing process efficiency and effectiveness, the Immigration Department has reviewed the overall process and implement reengineering. Review and reengineering are carried out because the Department found the capability process cannot cater for the number of applications received every day amounting more or less 380 applications.</p> <p>Capability of the producing and issuing passport before the improvisation effort implemented is as in Table 4.</p>

No.	Action
	<p>Based on the example in Table 4, Department is found incapable to process 380 passport applications received specifically at the level followed t:</p> <ol style="list-style-type: none"> Application approve Accept payment Approved and passport valid for issuing Passport issued to customers <p>Department is capable of approving application and receive payment for 156 applications. At the approval level for passport valid issuing, the capability is only of 78 applications per day. Same goes to the issuing level, where department only able to issue 78 passports per day to customers. The lack of capability at these levels has caused the occurrence of delay in the passport issued to customers every day. However, the work flow of passport preparation using machine such as preparation of image, printing, making plastic lamination and encoding chip has more capability that is capable of processing up to 390 passports a day.</p> <p>Based on the capability possessed, Department has set the cycle duration is of 3 days to issue passport to customers.</p> <p>Department has implement improvisation on the passport issuing process by implementing efforts followed:</p> <ol style="list-style-type: none"> Application acceptant and payment reception is managed at the same counter to make it easy for the customers. This effort has shortened the customers' time to get a service at the counter. Revise and shorten the actual time taken by each staff at all level of action in the work flow to upgrade the productivity of staff involved. Combine two tasks to be implemented by only a staff for the tasks followed : <ol style="list-style-type: none"> prepare image and print the main page of the passport; make plastic lamination and quality assurance review; and make encoding chip and print out observation page of the passports.

No.	Action
	<p>Outcome of the improvisation effort implemented, passport producing and issuing process can be upgraded its efficiency and effectiveness as followed:</p> <ul style="list-style-type: none"> a. Serving duration when receiving service (from the first application is issued to the payment made) reduce from 22 minutes to 6 minutes. b. Cycle time duration to produce and issue passport to customers is shortened from 3 days to 24 hours. c. Number of passport managed to produced and issued to customers increase from 195 passport per day to 390 passports per day. d. Number of staff involved can be reduced from 25 people to 17 people. <p>After improvisation implemented the capability of passport producing and issuing process has increased from 390 per day as in Table 5.</p>

No.	Action												
	<p>Based on this improvisation, Immigration Department has decided on the new performance that is:</p> <p>A. Performance target for measuring efficiency and effectiveness of key process to provide and deliver service to customers.</p> <table> <thead> <tr> <th data-bbox="667 415 716 443">KPI</th><th data-bbox="906 415 1235 443">PERFORMANCE TARGET</th></tr> </thead> <tbody> <tr> <td data-bbox="553 478 976 506">a. REVIEW ON THE SERVICE PERFORMANCE

12. Apart from implementing assessment continuously, agency needs to review the service delivery to customers on the whole. This is to ensure the service is in line to the vision, mission and objective of the agency and delivered efficiently, effectively and fulfil the customers' needs. This review is to evaluate matters below:

- (a) Service delivered to customers is in line with the vision, mission and objective of agency.
 - (b) Service delivered to customers is still relevant.
 - (c) Service deliver to customers is fast, accurate, efficient and effective.
 - (d) Sources are use to the optimum and efficiently to provide service that fulfils the customers' needs.
13. For this purpose agency needs to identify and analyse matters below:
- (a) Problem, issue, challenge, opportunity and obstacle to the agency vision, mission and objective progress.
 - (b) Needs and hope of the management in line with the program agreement of the agency, customer and stakeholders.

STRATEGY TO DEVELOP KPI AND IMPLEMENTATION OF THE PERFORMANCE ASSESSMENT OF THE GOVERNMENT AGENCY

14. To implement the performance assessment based on the model and implementation procedures recommended in this circular, Heads of Government Agency needs to implement actions below:

- (a) Determine the policy on the implementation of the performance assessment.
- (b) Form the Agency Performance Assessment Committee. This committee must consist of all Heads of Section in the agency and chaired at least by Deputy Head of Agency. Government Agency may use the existing committee to implement the task of this committee. The committee tasks are:
 - (i) Give comprehension and skill practise to all agency members to implement assessment.
 - (ii) Develop KPI and determine the Performance Target (Step 1).
 - (iii) Assess and Evaluate Performance (Step 2).

- (iv) Monitor Level of Performance (Step 3).
 - (v) Performance Improvisation (Step 4).
 - (vi) Report the outcome of performance assessment to the higher management continuously.
- (c) Implement the performance assessment of the agency every quarterly of the year.
- (d) Supervise, control and monitor the implementation of the performance assessment at the agency.
- (e) Gain customers' feedback on the service delivery including through the use of Customers' Satisfaction of the Counter Service Form and implement study on the customers' level of satisfaction consistently and occasionally.
- (f) Make analysis and prepare report on the performance assessment and report the outcome of assessment to Task Force to Reduce Bureaucratic Procedures.
- (g) Review holistically service delivery to customer to ensure it is still relevant and effective in line with vision, mission, objective of the agency and customers' needs.

CONCLUSION

15. Work culture based on performance needs to be practised holistically. This culture needs to be inculcated at all Civil Service levels. All agencies at the Federal, State, District and Local Government Authority level must take step to develop KPI, and implement the performance assessment to see the performance level of the agency. The agency also needs to take the improvisation action continuously to upgrade the quality of the service delivery to the level of customers' satisfaction. The effective implementation of the performance assessment at the Government agencies is believe to realise the wish to develop work culture based on the performance in Malaysia Civil Service.
